Re: Request for ½ mile and 5 mile well searches.

Dear Ms. Belkin:

Malcolm Pirnie, Inc. is interested in having three ½ mile manual well searches for Location A through C indicated below. We are also requesting a 5 mile computer printout for Location D to include all monitoring wells, domestic wells, public supply wells, irrigation wells and/or other water allocation permit users.

For the ½ mile searches the locations are as follow:

Location A (MISS):	74	04'	22"	40	53'	56"
Location B (SCANEL Property):	74	03'	53"	40	53'	17"
Location C (DMV):	74	04'	42"	40	53'	04"
Location D (5 mile radius search):	74	04'	20"	40	53'	53"

Enclosed you will find the above locations displayed in red on the accompanying topographic maps.

Please find enclosed our check in the amount of $395.00 ($345 + $50) to cover the cost of the three ½ mile manual well searches for locations A through C and the computer printout of all water allocation permit users within a 5 mile radius of Location D.

Very truly yours,

George A. Markt

The well search that you have requested includes the wells that are currently contained in the Water Allocation Files, which relate to the area in question. Recognizing the fact that all well records may not have been submitted, wells installed before 1947 are not included and that there can be errors in location, it is advisable to use this resource as a guide. The Bureau recommends that a field survey of the area in question be performed in order to verify all data. We try to maintain accurate well records; however, well locations are only as accurate as the information supplied by the drilling company. Therefore, we cannot guarantee their reliability. Local Health Departments should also be contacted concerning the locations of wells within their jurisdiction.

If you have any questions, please call or write to us in reference to "Well Searches" at:

NEW JERSEY RECTANGULAR COORDINATE GRID SYSTEM

for

THE LOCATION OF WELLS

The rectangular coordinate grid system is a seven digit number based upon the State Atlas Sheets, note the diagram on the following page. The first two digits of the number refers to the number of the State Atlas Sheet. The second two digits represent one of twenty-five blocks, each made up of six minutes of latitude and six minutes of longitude. The fifth digit represents one of nine *Rectangles* (contained within each block), each consists of two minutes of latitude and two minutes of longitude. The sixth digit represents one of nine smaller rectangles called a square (contained within each *Rectangle*). The seventh digit represents one of nine even smaller rectangular units (contained within each square) called a unit. Note the diagrams on the following two pages.

WELL CONSTRUCTION

Total depth drilled 22.5' ft.
Well finished to 22.5' ft.

Borehole diameter:
Top 8" in.
Bottom 8" in.

Well was finished: ☒ above grade ☐ flush mounted

If finished above grade, casing height (stick up) above land surface 1.5' ft.

Was steel protective casing installed? ☒ Yes ☐ No

Static water level after drilling Dry ft.

Water level was measured using Tape

Well was developed for _____ hours at Dry gpm

Method of development Dry

Note: Measure all depths from land surface	Depth to Top (ft.)	Depth to Bottom (ft.)	Diameter (inches)	Material	Wgt./Rating (lbs/sch no.)
Single/Inner Casing	+1.5'	12.5'	4"	PVC	Sch. 40
