Mr. Nicholas Marton, M.P.H., Case Manager Bureau of Federal Case Management New Jersey Department of Environmental Protection and Energy Division of Hazardous Waste Management CN 028, 5th Floor Trenton, New Jersey 08625-0028

Dear Mr. Marton:

MAYWOOD AND WAYNE SITES - IDENTIFICATION OF NEW JERSEY ARARS

On May 30, 1991, discussion were initiated with your predecessor, Mr. Edgar Kaup, for the development of New Jersey state applicable or relevant and appropriate requirements (ARARs) for the Maywood and Wayne FUSRAP sites. An agreement was made to provide the Department of Energy (DOE) with a list of state ARARs for soil, groundwater, surface water, and air for the radiological contamination. However, no list has been provided to DOE to date.

The development of state ARARs is required by the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) as well as Section XI of the Federal Facility Agreements (FFAs) signed by the Environmental Protection Agency (EPA) and DOE. A list of these requirements has tentatively been developed and is included in the Formal Draft of the Maywood Feasibility Study-Environmental Impact Statement (FS-EIS) that was sent to you on November 30, 1992. This list of ARARs will be applied to the Wayne site as well.

Please provide any comments or changes to this list of state ARARs by March 31, 1993, so they may be incorporated into the Final Draft that is currently being prepared. Without a response by March 31, 1993, we will assume you are in agreement with the list of ARARs included in the Maywood Formal Draft FS-EIS. If you have any questions, please contact me at (615) 576-5724.

Sincerely,

m. Care

Susan M. Cange, Site Manager Former Sites Restoration Division
