Mr. Maurice M. Weill  
51 Commerce Street  
Springfield, NJ 07081

Dear Mr. Weill:

**WHITELY DIVISION - VOIT SPORTS CHARACTERIZATION RESULTS**

The Department of Energy (DOE) has recently completed its radiological characterization effort of the AMF/Voit property located in Maywood, New Jersey. After reviewing the available historical information, subsurface results of the adjacent properties, and surface results of a walkover scan of the property, we have no reason to believe that any radioactive contamination exists within the bounds of the AMF/Voit property. We hope these findings assure you that construction modification to your facility may be carried out with no potential health risk.

If you have any questions regarding this matter, please call Robert Atkin at 615-576-1826.

Sincerely,

S. W. Ahrends, Director  
Technical Services Division
