Re: Results from the Westerly Brook Sampling Event (June, 1993)

Dear Ms. Cange:

The Environmental Protection Agency (EPA) is in receipt of the Department of Energy's (DOE) results from the 1993 sampling (sediment corings and surface water) of Westerly Brook and the Saddle River. Based on our review of this data and previous data from the Remedial Investigation Report, we concur with DOE's conclusion that there has been minimal impact on Westerly Brook and Saddle River from past thorium processing and other activities at the Maywood Chemical Company site.

If you have any questions, please call me at (212) 264-6667.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Jeffrey Gratz".
