FUSRAP Update

Maywood, New Jersey

Department of Energy
Oak Ridge Operations Office
Post Office Box 2001
Oak Ridge, Tennessee 37831-8723

September 1993

Dear Resident:

As many of you know, we have just completed a series of monthly availability sessions with special topic presentations. Since December, almost 100 residents have attended sessions on topics such as the results of the site surveillance program, the remedial investigation, and the baseline risk assessment. We also held a session that identified the cleanup options being evaluated for the site. I hope these sessions and the fact sheets we mailed to you have been helpful in understanding site activities and reports.

Thus far, activities at the Maywood site have been completed on schedule. Required reports such as the work plan, remedial investigation report, and baseline risk assessment have all been issued. However, the schedule has been impacted due to questions raised by the Environmental Protection Agency (EPA) regarding cleanup standards specified in the draft proposed cleanup plan. (See story on page 2.)

When I was notified about the delay, I immediately briefed local officials and the news media. I had intended to discuss the cleanup plan at the June availability session, however, I was unable to do so in light of possible changes to the plan resulting from resolution of EPA's comments.

Although I am disappointed about this delay, I am confident that the issue will be resolved quickly and that the proposed cleanup plan will be issued for public comment by this fall.

I hope you will continue to call the DOE Information Center when you need information or have site-related questions. As always, I am available to meet with you privately or in small groups. I will keep you informed through the *Update* and other information mailings on all site activities, including the status of the site schedule.

Sincerely,

Susan M. Cange

Susan M. Cange, Site Manager
Former Sites Restoration Division

DOE and EPA discuss Maywood site cleanup standards

Publication of the proposed cleanup plan for the Maywood site has been delayed pending resolution of questions from the Environmental Protection Agency regarding DOE's cleanup standards. EPA has requested that a stricter cleanup standard be used for soil in the subsurface (greater than 6 inches deep).

According to Susan Cange, FUSRAP manager for New Jersey sites, the cleanup standards used in the Maywood cleanup plan are the same standards used for all FUSRAP sites as well as other DOE and EPA sites. DOE and EPA are ~~meeting to resolve the issue. Once a resolution is reached, the proposed~~ cleanup plan for the Maywood site will be completed and published.

Two documents are still being developed as a part of the ongoing environmental review process. The feasibility study describes and evaluates a number of different cleanup options and the proposed plan will identify the recommended cleanup and disposal method for the contaminated materials. Following publication of these two documents, a public meeting will be held to receive comments on the proposed cleanup plan. After DOE responds to these comments, EPA and DOE will issue a Record of Decision. Public comments will be considered by DOE and EPA when making a final decision on site cleanup. The cleanup approach will be documented in the Record of Decision, which will include responses to public comments.

DOE will continue to keep residents informed about schedule changes and developments in the environmental review process as they occur through the Update and other mailings to those on the site mailing list.

For the second year, the Maywood Historical Committee displayed artifacts and historical information at DOE's Public Information Center during the annual Maywood sidewalk sale. About 75 people visited the information center to view the memorabilia.

DOE/OR2149-364

Formerly Utilized Sites Remedial Action Program (FUSRAP)
Contract No. DE-AC05-91OR21949MAYWOOD INTERIM STORAGE SITE
ENVIRONMENTAL REPORT
FOR CALENDAR YEAR 1992100 West Hunter Avenue
Maywood, New Jersey

May 1993

Results from the 1992 environmental surveillance program at the Maywood site are now available. The annual site environmental surveillance report contains estimates of the potential exposures to members of the public from radioactive material present at the site. Based on site monitoring data, meteorological data, and local land use, the report concludes that potential human exposures are well below protection guidelines established by the National Council on Radiation Protection and DOE. The 1992 annual site environmental report is included in administrative record file, located at the DOE Public Information Center and the Maywood Public Library. For a copy of the report, call the information center.

During the process of selecting a preferred remedy for the Maywood site, the following documents, studies, and evaluations are published. They are available in the administrative record file for the Maywood site. The record is

<i>Name</i>	<i>Description</i>	<i>Date available</i>
Federal facility agreement (FFA)	Agreement between EPA and DOE that requires an investigation of environmental impacts of site activities. Also ensures that appropriate remedial action occurs to protect the public health and the environment.	April 1991
Work plan/ implementation plan	Describes the planning process for characterizing the site. Also includes a responsiveness summary, which is DOE's response to comments made at a public meeting.	November 1992
Remedial investigation (RI) report	Describes the type and extent of contamination.	February 1993
Baseline risk assessment (BRA)	Assesses the risks to public health and the environment if the site remains as it is.	April 1993
Feasibility study	Describes the development and evaluation of many different cleanup options.	pending
Proposed plan	Solicits public comment on the preferred method of cleanup.	pending
Record of decision (ROD)	Identifies the cleanup method that will be used at the site.	pending

Note: An environmental impact statement is also being prepared and is comprised of the feasibility study and proposed plan.

located at the Maywood Public Library, 459 Maywood Avenue, and at the DOE Public Information Center, 43 West Pleasant Avenue. Because most of these documents are quite large, fact sheets are available that briefly describe the reports and summarize results. Call the information center at 843-7466 to request the report or a fact sheet.

Earth Day at Maywood Avenue School — Steve Liedle, of Bechtel National, Inc. (DOE's FUSRAP contractor), explains to students that radiation is found naturally in the environment and in some common household items such as salt, bananas, smoke alarms, and brazil nuts.

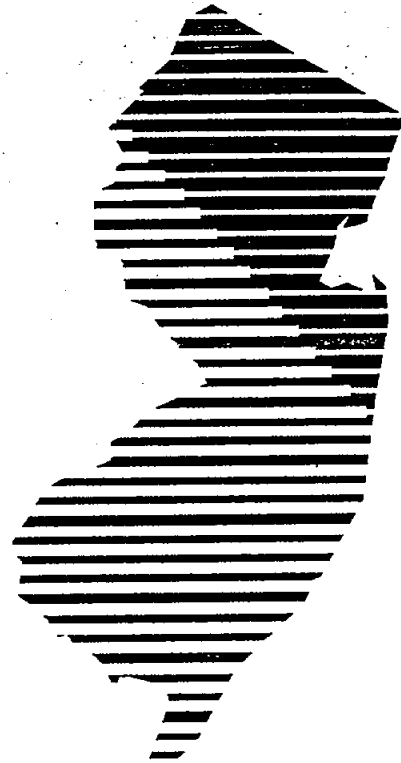

Chris Pohts, Maywood Avenue student of the month for April, suits up in protective clothing while Susan Cange, DOE's site manager, talks to students about environmental cleanup and career opportunities in environmental work.

Coming soon: Information session on the results of the 1992 environmental monitoring program. September 28 at 6 p.m. DOE Public Information Center, Maywood.
