Dear Ms. Carpenter:

MAYWOOD SITE - TRANSMITTAL OF QUARTERLY REPORT

This letter transmits the quarterly report for the Maywood site as required by Section XX(A) of the Federal Facility Agreement for this site. If you have any questions, or need additional information, please contact me at (423) 241-6344.

Sincerely,

John Michael Japp, Site Manager
Former Sites Restoration Division

QUARTERLY REPORT FOR THE MAYWOOD SITE
FEDERAL FACILITY AGREEMENT REQUIREMENT XX(A)

Reporting Period: 4/1/97 - 6/30/97

Report Date: July 21, 1997

I. GENERAL INFORMATION

The Maywood Cooperative Guidance Group (CGG) met on April 7, April 24, May 5, May 29, June 12 and June 23. The focus of these meetings was to familiarize members of the CGG with the CERCLA process, remedial action approaches, including excavation, transportation, disposal and treatment. On May 29 members of the CGG were given a tour of the Maywood Site and vicinity properties in Maywood and Lodi. The purpose of the tour was to acquaint members of the CGG with the properties, site conditions and extent of contamination.

"Kitchen table" meetings were conducted the week of May 5 with the homeowners of the vicinity properties scheduled to be remediated this spring and summer. The purpose of these meetings was to familiarize the homeowners with the nature and extent of the work that will be performed on their properties.

II. FFA COMPLIANCE

Bi-monthly project managers meetings were held on April 18, 1997, and June 27, 1997, in accordance with Section XIV(E) of the FFA.

III. ON-SITE ACTIVITIES

Environmental monitoring of groundwater, surface water, and sediment at the Maywood Interim Storage Site (MISS) was performed in May and June.

Work began on the Maywood vicinity properties in June. The properties to be remediated during the spring and summer of 1997 include 5 and 7 Shady Lane, 34 Long Valley and an unremediated portion of Lodi Park, all in Lodi, New Jersey. A residential property in Maywood, located at 200 Brookdale, will also be remediated.

IV. ENVIRONMENTAL DOCUMENTATION

The final Environmental Surveillance Technical Memorandum was issued to the public on May 28.

The NESHAPS Subpart H report, which also includes Subpart Q monitoring data, was issued in June and provided to the EPA by the June 30th annual deadline.

V. PLANNED SIGNIFICANT EVENTS

Volume reduction, and subsequent disposal of the Maywood pile, currently being staged at the Envirocare facility in Utah, will take place.

Remedial action will continue during the spring and summer of 1997 on residential properties in Maywood and Lodi.

During July, the radon/thoron and external gamma detectors will be changed out as part of the routine environmental surveillance program.

VI. ISSUES/RESOLUTIONS

Discussions with NJDEP on state concurrence with the soil cleanup criteria for radionuclides are currently on hold. Discussions are expected to continue once a decision is made on releasing the Proposed Plan and after the state has completed revisions to pertinent state environmental regulations.
