May 15, 1995

Dear Mr. Hirsch:

**RE: SAMPLING RESULTS TO COME; NEW CONTACT PERSON AT  
THE MAYWOOD INFORMATION CENTER**

We have a new person heading up our local Department of Energy information center in Maywood. His name is Stuart Price. You'll undoubtedly be meeting him or talking with him soon as we progress with our cleanup work.

In fact, we will be contacting you in the coming weeks to discuss the results from our last round of soil sampling at your property, which took place in March. We are a little behind in getting with you about those results; the data turnaround from the laboratory is taking longer than we expected. Your patience on this is appreciated.

I appreciate the time and cooperation you've given me in scheduling workdays at your home. I look forward to working with you more as we progress.

The closer we get to starting work the more we'll be talking with you and maybe meeting with you to discuss work plans. I hope you will work with Stuart in the same spirit that you have worked with me. He is now a main point of contact through our Public Information Office on West Pleasant Avenue.

**FUSRAP**

FORMERLY UTILIZED SITES REMEDIAL ACTION PROGRAM

New Information Contact - 2

A graduate of Virginia Polytechnic Institute and State University, Stuart has a background in communicating environmental programs. Most recently, he worked for Westinghouse Electric Corporation at DOE's Waste Isolation Pilot Plant in New Mexico. He has also been an environmental affairs training representative with Hercules Inc. in Virginia.

As with all of us on DOE's New Jersey team for the Formerly Utilized Sites Remedial Action Program, Stuart is here to work with you in any way concerning our environmental cleanup efforts in your community. If you have any questions, please give him a call at the information center. He will get answers to your questions. If you have a concern, he'll work to understand it, relay it to the rest of the team, and help incorporate it into our thinking as we progress in the cleanup of the Maywood Site.

The job at hand in cleaning up residential properties is driven by funding and will take time. Three to six years is the estimate. Fortunately, the work is about to begin on the first properties in the cleanup effort. I hope that Stuart and I can continue to enjoy a good working relationship with you.

The phone number at the information center is (201) 843-7466. Call us anytime.

Sincerely,

Wayne Scarbrough

May 22, 1995

Dear Ms. Vara:

**RE: SAMPLING RESULTS TO COME; NEW CONTACT PERSON AT THE MAYWOOD INFORMATION CENTER**

We have a new person heading up our local Department of Energy information center in Maywood. His name is Stuart Price. You'll undoubtedly be meeting him or talking with him soon as we progress with our cleanup work.

In fact, we will be contacting you in the coming weeks to discuss the results from our last round of soil sampling at your property, which took place in March. We are a little behind in getting with you about those results; the data turnaround from the laboratory is taking longer than we expected. Your patience on this is appreciated.

I appreciate the time and cooperation you've given me in scheduling workdays at your home. I look forward to working with you more as we progress.

The closer we get to starting work the more we'll be talking with you and maybe meeting with you to discuss work plans. I hope you will work with Stuart in the same spirit that you have worked with me. He is now a main point of contact through our Public Information Office on West Pleasant Avenue.

FORMERLY UTILIZED SITES REMEDIAL ACTION PROGRAM

New Information Contact - 2

A graduate of Virginia Polytechnic Institute and State University, Stuart has a background in communicating environmental programs. Most recently, he worked for Westinghouse Electric Corporation at DOE's Waste Isolation Pilot Plant in New Mexico. He has also been an environmental affairs training representative with Hercules Inc. in Virginia.

As with all of us on DOE's New Jersey team for the Formerly Utilized Sites Remedial Action Program, Stuart is here to work with you in any way concerning our environmental cleanup efforts in your community. If you have any questions, please give him a call at the information center. He will get answers to your questions. If you have a concern, he'll work to understand it, relay it to the rest of the team, and help incorporate it into our thinking as we progress in the cleanup of the Maywood Site.

The job at hand in cleaning up residential properties is driven by funding and will take time. Three to six years is the estimate. Fortunately, the work is about to begin on the first properties in the cleanup effort. I hope that Stuart and I can continue to enjoy a good working relationship with you.

If you have a concern, he'll work to understand it, relay it to the rest of the team, and help incorporate it into our thinking as we progress in the cleanup of the Maywood Site.

The job at hand in cleaning up residential properties is driven by funding and will take time. Three to six years is the estimate. Fortunately, the work is about to begin on the first properties in the cleanup effort. I hope that Stuart and I can continue to enjoy a good working relationship with you.

The phone number at the information center is (201) 843-7466. Call us anytime.

Sincerely,

Wayne Scarbrough

May 15, 1995

Dear Mr. Elazab:

**RE: SAMPLING RESULTS TO COME; NEW CONTACT PERSON AT  
THE MAYWOOD INFORMATION CENTER**

We have a new person heading up our local Department of Energy information center in Maywood. His name is Stuart Price. You'll undoubtedly be meeting him or talking with him soon as we progress with our cleanup work.

In fact, we will be contacting you in the coming weeks to discuss the results from our last round of soil sampling at your property, which took place in March. We are a little behind in getting with you about those results; the data turnaround from the laboratory is taking longer than we expected. Your patience on this is appreciated.

I appreciate the time and cooperation you've given me in scheduling workdays at your home. I look forward to working with you more as we progress.

The closer we get to starting work the more we'll be talking with you and maybe meeting with you to discuss work plans. I hope you will work with Stuart in the same spirit that you have worked with me. He is now a main point of contact through our Public Information Office on West Pleasant Avenue.

FORMERLY UTILIZED SITES REMEDIAL ACTION PROGRAM

New Information Contact - 2

A graduate of Virginia Polytechnic Institute and State University, Stuart has a background in communicating environmental programs. Most recently, he worked for Westinghouse Electric Corporation at DOE's Waste Isolation Pilot Plant in New Mexico. He has also been an environmental affairs training representative with Hercules Inc. in Virginia.

As with all of us on DOE's New Jersey team for the Formerly Utilized Sites Remedial Action Program, Stuart is here to work with you in any way concerning our environmental cleanup efforts in your community. If you have any questions, please give him a call at the information center. He will get answers to your questions. If you have a concern, he'll work to understand it, relay it to the rest of the team, and help incorporate it into our thinking as we progress in the cleanup of the Maywood Site.

The job at hand in cleaning up residential properties is driven by funding and will take time. Three to six years is the estimate.
