RE: JFK Park Improvements
Borough of Lodi, Bergen County, NJ
Our File No. LO-104-11

Dear Mike:

The Contractor of this project, S-Cape, has advised me that work will begin on January 30, 1995 for the above-referenced project. S-Cape is going to begin work at the south end of the park. They will not work in the contaminated section until your office has defined the limits of contamination.

In order for work to proceed expeditiously, I would like to request that your office do the following restake-out the entire sub-surface contaminated area indicated by the blue and pink locations on your drawing. Also, stake-out the surface contaminated areas indicated on your plan. In addition, we would like the contaminated bore holes also staked-out.

We have discussed the possibility of scanning the entire park. If you feel this is practical and useful, we would like to pursue this action.

Please advise me of your schedule and if you have any questions, please do not hesitate to contact the undersigned.

Very truly yours,

BOSWELL McCLAVE ENGINEERING
