Attention: Mr. Michael Nannini

Subject: Maywood Site - Reply to Letter Concerning JFK Park
Improvements

Dear Mr. Nannini:

In response to your letter of January 27, a technician from Bechtel has delineated the areas of contamination and located the contaminated boreholes at JFK park for your subcontractor.

I do not feel that scanning the entire park would be practical. It is very time consuming on such a large area when we know that the surface contamination only covers a very small percentage of the park. The technician perform a limited surface scan when he laid out the areas of contamination and the contaminated boreholes.

If you request, I can have a health physics technician available to perform equipment and personnel surveys while the subcontractor is working in the contaminated area. Please contact Mr. John Stevenson at our local office (201-835-0504) with as much lead time as possible in order for us to support your efforts.

If you have any questions or need any additional information, please contact me at (615) 576-4718.

Sincerely,

M. E. Redmon
Project Manager - FUSRAP
